PERSONAL PROJECTS

ISS Tracker
- A web app that fetches the current location of the International Space Staion. It also shows the number of people in space at the moment, who they are and where they are.

Robo Yearbook
- A web app that fetches data from a server and uses it to create and display an output of 10 'cards', each with an image, name and email. It also has a search function that filters through the cards.

Face Recognition Web App
- A web app processes the image taken with the user's camera, detects faces and determines characteristics of those detected.

CERTIFICATES

Binance Masterclass in Blockchain Development
(2021 - 2021)
